Marine Virtual Research Environment

A marine virtual research environment providing open data services in support of marine biodiversity and ecosystem research

ACCESS

Retrieve and access data resources holding marine biodiversity and ecosystem data. A range of data systems offering data on species names, traits, distribution and genes.

arineSPEED: Marine SPEcies

ANALYZE

Use online tools that facilitate data analysis of marine biodiversity and ecosystem data. Analysis is performed on data from known data resources and/or data uploaded by the user.
