

# Marine Virtual Research Environment

A marine virtual research environment providing open data services in support of marine biodiversity and ecosystem research

## ACCESS

Retrieve and access data resources holding marine biodiversity and ecosystem data. A range of data systems offering data on species names, traits, distribution and genes.

## ANALYZE

Use online tools that facilitate data analysis of marine biodiversity and ecosystem data. Analysis is performed on data from known data resources and/or data uploaded by the user.

## DEVELOP

Build your own marine virtual lab making use of a range of available web services that access and process data. Service catalogues and 'how to' manuals help you to develop your own system.
