

VRE: the case study of Phytoplankton

Working Session: Marine Biodiversity & Ecosystem Functioning
Rome, 29 may 2019| ***Elena Stanca & Ilaria Rosati***

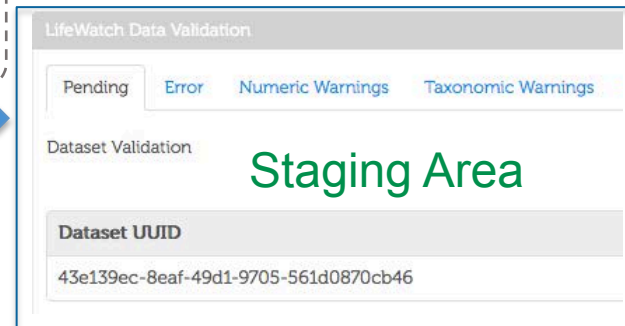

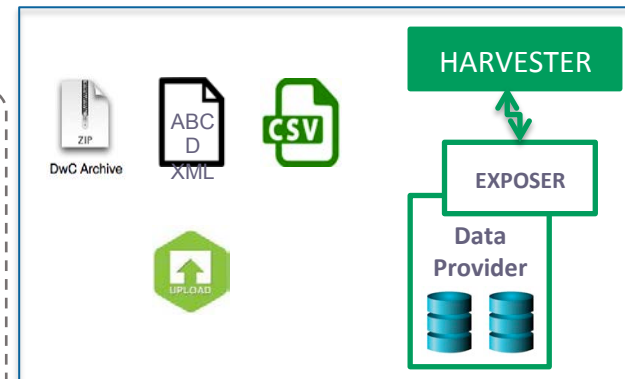

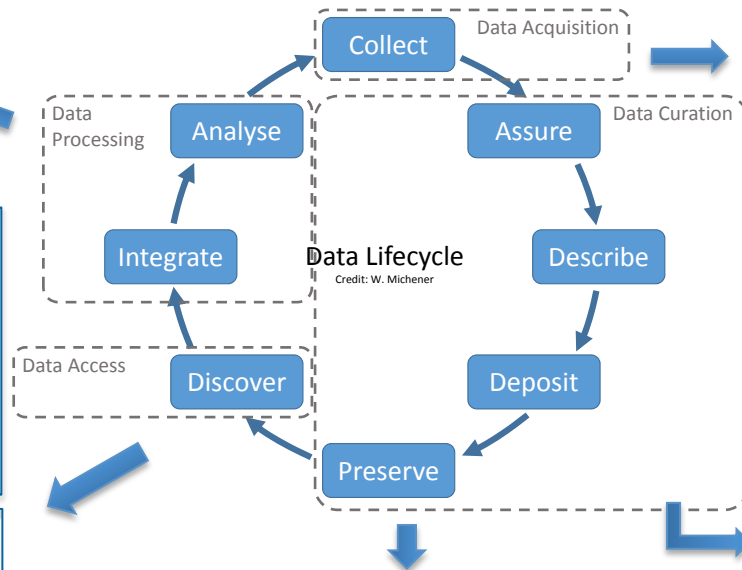

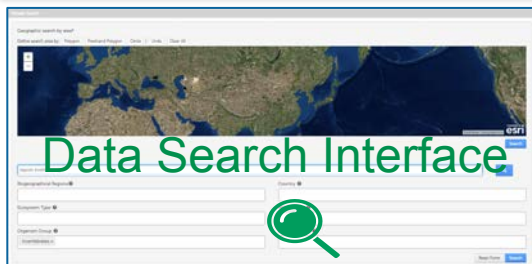

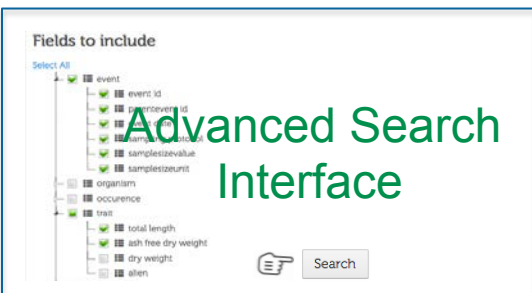

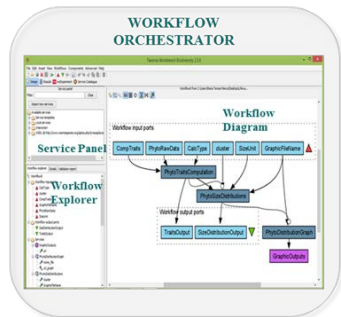

Virtual Research Environment (VRE)

A VRE is a web-based workspace providing seamless access to all services a researcher needs to do his work and collaborate with his community.

This includes:

- Software
- Data
- Workflows
- Collaboration tools
- Instrumentation and high-performance computing

VRE: the case study of Phytoplankton

VRE: the case study of Phytoplankton

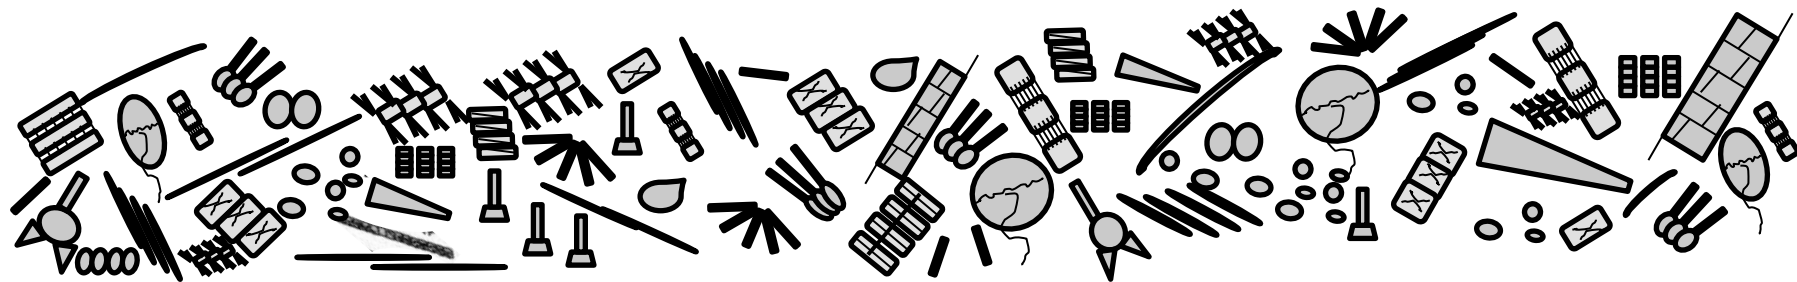

Does phytoplankton show size distribution pattern along a latitudinal gradient?

Phyto VRE

Thank you
